

CARNEGIE INSTITUTION OF WASHINGTON
DEPARTMENT OF GENETICS
COLD SPRING HARBOR, LONG ISLAND, N. Y.

June 2, 1955

Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison 6, Wisconsin

Dear Joshua:

I am sorry to have delayed sending you a copy of our data as I promised, but work connected with the Symposium is keeping me plenty busy at present. Enclosed are the data from a four-point experiment. I assume that you are familiar enough with our system of nomenclature to be able to decipher them.

I would like it very much if you could visit us this summer and give seminar talks, one at the phage course and one at the Bacterial Genetics course. The phage course ends on July 9 and the Bacterial Genetics course begins on July 13. If you could spend about a week here around that time, we could arrange things so that you could give two seminars. Of course we would be very happy if you could stay here longer. The Biological Laboratory is ready to pay your travel and living expenses.

With best regards,

Sincerely yours,

M. Demerec
